**HULL/DECK CONSTRUCTION MATERIAL**

Hull: construction from female mould with sandwich bottom with balsa wood core and sandwich sides with closed cell PVC core; reinforcement fibers: E glass. Stratification of longitudinal stiffeners with polyurethane foam; stratification of transversal stringers with PVC core at bow, with polyurethane foam at stern.

Deck and superstructure: construction from female mould with vacuum infusion lamination with vinylester resin in closed cell PVC core sandwich format.

Main bulkheads and interior structural floors in sandwich format and vacuum infusion lamination.

Structural tanks for fuel, fresh water, grey and black water, are layered with vinylester resin.

Areas of the deck are covered in teak sealed with polymerized black rubber caulking.

STANDARD FURNITURE WOOD: Ash preformed wood

**PAINTING**

Keel painting: upon request.

External painting: white gelcoat\*; areas above the water line that are painted in a different color according to the standard Pershing shipyard graphics are treated with a bi-component polyurethane paint in black color.

<sup>[1]</sup> This technical specification is valid and refers to yacht ordered as of 1 September 2019.

<sup>[2]</sup> Performances are approximate and they refer to the standard equipment of the boat, at 1/3 of load corresponding to ton. 40,33 [88912 lb], performances estimated at the following conditions: calm sea, absence of wind, 25°C air temperature, clean hull and special propellers set for those conditions and 6 people on board. Overloading the yacht by 0,5 ton / 1102 lb top speed decreases of 1 knot.

<sup>[3]</sup> Pershing shipyard does not supply complete safety equipment as Pershing yachts are delivered to all countries, owners must therefore complete the safety equipment with the devices required in their own specific country. Pershing can, however, supply safety equipment upon request.

<sup>[4]</sup> The stated draft is with the surface drives in the zero position.
